Our summer camp, hopes to create good habits in all areas of our students' lives, both as future sportsmen/women and also as exceptional people.

Our timetable is designed to develop the technical abilities of each player, while not forgetting the need for enjoyment, and while also stressing values such as sportsmanship and respect towards each other.

In this club we intend to improve the players' techniques, reinforce the skills already acquired in their own clubs, and create tennis players who are able to understand the overall game and choose the best option at any given moment.

This year as new, those attending the camp could do one hour of English per day.
